Tangerine Automation Interface – 2024-01 Software Release
Software installation instructions for new systems

1. **Preliminary steps**

   1.1. Download the latest version of Injektor and the TaiMothership

Injektor (2024-01)	http://gofile.me/4fKWH/ToP6hMfUa
TaiMotherShip	http://gofile.me/4fKWH/aTAZ3JCwJ

   1.2. Quit Pro Tools if it's running

2. **Install the new version of Injektor**

   1. Decompress the INJEKTOR zip file.
   2. Drag the decompressed INJEKTOR to your applications folder.

3. **Install the new version of TaiMothership**

   1. Go to your PT plug-in folder located at: /Library/Application Support/Avid/Audio/Plug-Ins
   2. Move the TaiMotherShip zip (downloaded in step 1) to your PT plug-in folder.
   3. Decompress the plug-in directly in the folder.
   4. Right-click on TaiMotherShip.aaxplugin plug-in and choose open. This will open PT and allows you to bypass the upcoming security warning.
      a. If PT tells you that macOS can't check the security of the plugin, choose "open".
      b. If Open is not available, PT will tell you the plug in is not valid.
      c. Quit Pro Tools and right-click the plug-in again. You may need to do this 2-3 times in total. This is only necessary on first start.
   5. Delete the TaiMotherShip zip, leaving only the plug-in in place
